### **CULTURAL GUIDE**

Cacti and succulents are natives of arid regions, so try to maintain desert conditions; dry atmosphere, **PLENTY OF LIGHT** and not much water. They can go long periods without water.

**Watering Instructions:** Set pot in saucer of water for  $\frac{1}{2}$  minute, or just long enough for water to rise to top of pot. Do this once every ten days. Water very sparingly in winter.

**REPOTTING:** Remove all soil from roots, prune roots to  $\frac{1}{2}$  their previous length. Plant in a mixture of equal parts of good garden loam and **COARSE** sand. Very little fertilizer, if any, is required. Rank growth is not desirable.
